EZ 2S

Future of Socket SubmeterS

Solid State Socket Meter Model#EZ 2S2

Product Overview

The backbone of this meter is powered by EZ Meter's robust, revenue grade proven product line modified to meet our client's ever evolving needs. This is designed for Read, Bill and Collect companies to remotely read a socket meter with the NextCentury Radio System.

Next Century System

The simplicity of installation combined with our passion for providing the highest quality products and services has led NextCentury's solution to become the new standard across all applications of submetering.

Features:

- Meters are UL Listed
- Radios are FCC Certified
- Radio is embedded on the EZ Meter, one unit
- No start up pulse generated
- Revenue grade accuracy
- Mobile App for in-field setup
- Real-time verification of network communication
- Open API access to interval data
- Radio serial # engraved on front with barcode for easy installation

Benefits

- NextCentury Integrated Radio
- Pre-Programming Available
- NextCentury Gateway Enabled
- Radio doesn't require battery
- Tested to ANSI C12.20 Accuracy

Meter Specifications:

Nominal Voltage: 240Vac

Frequency: 50-60 Hz

Power Consumption: Less than 2 watts

Automatic Meter Reading: Pulse with 3.3V

Pulse Duration: 50 milliseconds

Physical Size: 6.97"x4.93"

Available Forms: 2S

Operating Temp: -20F to 160F

-20C to 71.1C

Storage Temp: -40F to 160F

-40C to 71.1C

Accuracy: Revenue Grade

TR4-E Embedded NC Specifications (Optional):

- FCC 2A8EC-TR4 | IC 28950-TR4
- 902-928 MHz wireless, unlicensed band
- Advanced two-way communication
- Redundant software and hardware encryption
- Automatic route discovery and optimization
