

Turn Meter Data into Action

NextCity gives water utilities everything they would need in one beautifully simple platform. Go from a city-wide view of consumption down to a single meter's hourly reads in a few clicks, catch leaks and anomalies the moment they start, and give residents a portal that keeps them informed. All in one intuitive, cloud-based platform, built and supported in-house.

Built in-house. Hardware, firmware, and software developed and maintained by our team in Utah.

Key Benefits

- Cloud-based, no servers to maintain
- 15-minute read resolution
- Configurable multi-channel alerts (text, email, or portal)
- Flexible, scheduled report builder with legacy-format exports
- GIS mapping with drag-and-drop meter placement
- ISO 27001-certified data security
- Resident portal with two-way messaging
- Multi-tenant management with super-admin views
- Grows with you: manual read → drive-by → fixed-network AMI

NextCity Platform Overview

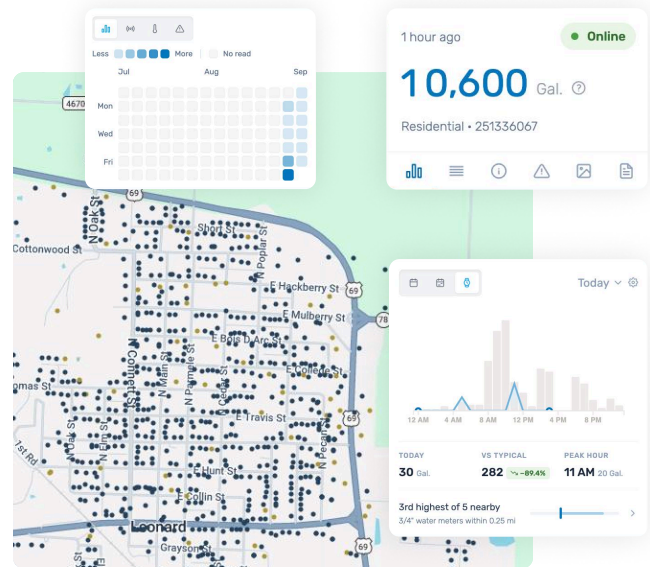

See Your Whole System at a Glance

Examine city-wide consumption, then drill straight down to a single meter to understand what's happening and why.

- City-wide consumption trends with click-through to any location or meter
- Hourly, daily, monthly, & yearly usage with period-over-period comparisons
- Group-level views to compare routes, zones, and districts side by side
- Interactive Insights dashboards plus map and location views

Highlight: Go from a whole city's usage to one meter's hourly reads in a few clicks.

Trust Every Read

Detailed meter and location records with data integrity built into daily operations.

- Per-meter and per-location detail pages with full read history
- 15-minute read resolution for granular history
- Automatic flags for missed, zero, or out-of-range reads so issues surface before billing
- Timestamped raw reads kept exactly as received from the meter, for a clean audit trail

Highlight: See per-meter and per-location reads to ensure data integrity.

Catch Issues Before They Cost You

Proactive, configurable alerts turn your meters into an active loss-prevention system.

- Leak, burst, continuous & reverse flow, zero-usage, freeze, tamper, low-battery, & no-comm alerts
- Thresholds and visibility set at the org, group, or meter level
- Deliver alerts by text, email, and in-platform
- Surface non-revenue water and recover lost revenue

Highlight: Tune the same alert differently per group or per meter, all in the app.

Report on Your Terms

A flexible report builder that adapts to how your utility already bills and organizes the results by your groups.

- Generate custom reports with built-in AI agent
- Configurable columns, headers, and formats; dynamic inputs with defaults
- Schedule generation and auto-deliver to the right recipients
- Create reports on meters, devices, alerts, usage, and more in seconds.

Highlight: Match a utility's existing billing file format for a smooth switch from legacy systems.

Easily Integrate Into Your Billing

NextCity easily integrates into your billing system.

- Billing-ready consumption totals per account, aligned to your billing cycle dates
- Export reads in the formats your billing or CIS software already accepts
- Meters linked to your existing account and service location IDs, so no re-keying
- Scheduled, automatic read delivery that removes manual meter-read uploads

Highlight: Export reads in the formats your billing or CIS software already accepts

Engage Your Residents

Extend the platform to the people who use the utilities and reduce high-bill complaints.

- Utility-branded, web-based and mobile-friendly portal
- Household usage: hourly, daily, monthly, & yearly with comparisons
- Residents set their own leak, high-usage, and vacation alerts
- Two-way messaging connects residents and city staff directly

Highlight: A branded resident experience with no complex integration required.

Feature Snapshot

- Cloud-based, no servers to install or maintain
- Insights dashboards from city-wide to a single meter
- 15-minute read resolution
- Device-specific keys & multi-layer encryption
- In-house engineering means fast feature turnaround
- Over-the-air updates & full backwards compatibility
- Multi-org / multi-city management with super-admin views
- Global search across orgs, devices, & residents
- Resident portal with two-way messaging
- Configurable multi-channel alerts (text, email, portal)
- Flexible, schedulable report builder with legacy exports
- Group-based organization for routes, virtual metering zones, & districts
- GIS mapping with drag-and-drop meter placement
- Companion mobile app for field techs

Why Choose NextCity for Your Utility

Recover non-revenue water

Catch leaks, theft, and inaccurate metering early and turn lost water back into billed revenue.

Adopt at your own pace

Start with the workflow you have and scale to a full fixed network. No hardware swap, no platform changes.

A partner, not a vendor

In-house engineering means the roadmap responds to real utility feedback fast.
