

EN-201 Pulse Converter Firmware Update Notice

Overview

A new firmware version has been released which expands the EN-201 Pulse Converter compatibility to additional meters. If an order is being filled for Pulse Converters, please verify which meter type the units will be installed on.

No Dot Pulse Converter Firmware (1.4.3)	Updated Firmware Gold Dot (1.4.5) - Additional Meter Compatibility	Updated Firmware Silver Dot (1.6.1) - Additional Meter Compatibility
<ul style="list-style-type: none"> • Neptune E-Coder • Neptune ProRead • Sensus SR-II 5/8" meters • Other Sensus protocols 	<ul style="list-style-type: none"> • Sensus Omni R2/iPerl • Sensus SR-II ICE 3/4" • Neptune ProCoder • Badger HR/E 	<ul style="list-style-type: none"> • Badger ADE • Badger HR/E LCD • Hersey Translator • Mueller SSR

Updating Needed Stock

While future production runs of the EN-201 will be manufactured with updated firmware, existing inventory will need to be sent to NextCentury to be updated if being used with the meters listed above.

If orders are received that need to be filled with the updated firmware Pulse Converters, please email support@nextcenturymeters.com to facilitate this update.

Identifying Firmware Version

EN-201 units that have received a firmware update are marked with a dot as indicated on the image below. Units with previous firmware do not have a dot. **Gold** dot = 1.4.5. **Silver** dot = 1.6.1.
